

Application Procedure for Research Discount

To encourage post-publication research on Pearson test publications, Pearson grants a fifty percent (50%) research discount on Pearson test materials purchased for use in an approved research project.

The research discount:

- Applies only to test materials required for the proposed research project;
- Cannot be applied to orders that have already been shipped to you; and
- Applies only to test materials published by Pearson (not to items from other publishers that Pearson distributes).

The following conditions must be met in order to obtain a research discount:

1. The researcher must meet the Pearson User Qualification requirements necessary for the test being used in the research project. Graduate students must have their advisor or research sponsor sign their *Application for Research Discount*.
2. A brief Project/Research Plan that describes the proposed research project must be submitted with the completed *Application for Research Discount*.
3. A research committee at Pearson must approve the proposed research project.
4. **The researcher must agree to share the results of the research study with Pearson, and Pearson may disseminate the findings, with appropriate citation, to customers or others interested in such information.**

Please send your completed documentation to Learning Assessments Customer Service:

- Application for Research Discount (including the completed Test Materials Requested information)
- Accreditation Form
- Project/Research Plan
