

AIMSweb 1.0 Retirement Checklist

The AIMSweb® 1.0 platform you are currently using will be retired and no longer available after July 31, 2019. As our valued customer, we want to make sure that you are prepared for this change and we have developed this checklist to help facilitate a smooth transition.

Customers who are not transitioning to aimswebPlus should take steps to export data and preserve reports from your AIMSweb 1.0 account before the retirement date.

AIMSweb 1.0 data and reports will not transfer to aimswebPlus, but you can take steps now to export data and preserve reports from your AIMSweb 1.0 account.

Data

Historical data can be exported from the AIMSweb 1.0 system. The AIMSweb 1.0 system has data export templates within the application that you can use to export rosters, benchmark, and progress monitor scores. ***Keep in mind that data must be exported prior to the platform's retirement on July 31, 2019.***

Reports

Reports can be printed from the AIMSweb 1.0 system. We recommend that the aimsweb account manager for each school runs these reports at the end of the school year, prior to the July 31 date. If assistance is needed in completing these tasks, please contact aimsweb Data Support at 866.313.6194 > Option 1 > Option 3.

The aimswebPlus Pilot Program

We have set up a complimentary pilot program for customers interested in moving from AIMSweb 1.0 to aimswebPlus. The program will allow you to use aimswebPLUS for the remainder of the school year, helping to familiarize you with its navigation, assessments, and reports. It also includes complimentary webinar training on account setup and rostering, administering the measures, accessing reports, and progress monitoring.

To take advantage of the aimswebPlus Pilot program, please sign up [here](#).

Pearson

Here is a handy checklist and timeline to help you plan for the retirement of AIMSweb 1.0 and your transition to aimswebPlus!

Suggested timeline

February – May

- Request an aimswebPlus Pilot account ([here](#)).
- Test/pilot a group of students in the aimswebPlus account.
- As part of aimswebPlus pilot program, attend complimentary webinar training on account setup, administering the measures, accessing reports, and progress monitoring.

May – June

- Identify any printed or digital reports that may be needed from the AIMSweb1.0 system before the July 31, 2019 system retirement date.
- Once the school year testing and reporting activity is complete, extract all historical data from your AIMSweb 1.0 account through a system export.
- Print identified student and aggregate reports needed from AIMSweb 1.0, and save digital .pdfs or printed reports to the appropriate paper or online file.
- Customer/account manager should check with all users within the AIMSweb 1.0 account to confirm necessary data and reports have been exported from the system.

If assistance is needed to complete any of these tasks, please contact aimsweb Data Support at 866.313.6194 > Option 1 > Option 3.
